PROJECTS

Personal Portfolio [↗](#)

I created a personal portfolio website to showcase my skills, education, projects, and other relevant information. The website was designed using HTML, CSS, and JavaScript, and included a responsive layout for optimal viewing on different devices.

Weather Forecast Website [↗](#)

This project involved creating a website that provides weather forecasts for different locations. The website utilized an API to fetch real-time weather data and displayed it in a user-friendly manner. Users could enter a location and view current weather conditions and temperature.

Gym Website [↗](#)

The goal of this project was to design and develop an attractive and functional landing page for a gym website. The landing page serves as the first point of contact for potential customers, providing them with an engaging and informative introduction to the gym.
